REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: the prior art of record does not disclose or fairly teach a method or a system for planarizing a substrate having one or more materials formed thereon, comprising: the method of dispensing a polishing fluid to the polishing pad, the polishing fluid being subjected to carbonation prior to being dispensed to the polishing pad; the polishing fluid comprising potassium hydroxide and having a PH of from about 9.5 to about 11.5 and being subjected to carbonation for about 5 to about 1000 seconds prior to being dispensed to the fixed abrasive polishing pad; a polishing fluid for a fixed abrasive polishing pad configured to remove materials formed on a substrate surface, the polishing fluid comprising: potassium hydroxide, deionized water', and carbon dioxide; or a polishing system for planarizing one or more materials formed on a substrate surface, comprising a polishing fluid delivery system adapted to deliver a polishing fluid to the polishing pad, the polishing fluid delivery system including a carbonation system. The closest art of record, to Feeney et al, US006355565B2, teaches to constantly agitate the slurry with a nitrogen gas bubbler, to prevent clumping of particulates, see column 6, lines 27-33.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
